Monthly Operation Values - Wilson Lisbon
Exhaust Gas Temperature
Air Tightness Test
Critical Sparepart & Measuring Tools
Critical Equipment Check

In the page **„Engine Operation Value“** you must fill daily the operation values like Exhaust temperature, Luboil pressure, Coolingwater pressure and similar as requested on this page into the yellow cells. In addition you can write internal notes into the small yellow Notebook.

A double click on the Note Book opens a text frame.
Please safe the page after each entry.
